PPA-Office Management System - Hashe Computer Solutions
Role:
· Application Developer
Tools:
· PHP, MySQL, JQuery
Details:
PPA (Pakistan Progressive Associate) is licensed by Ministry of Labor, Manpower and Overseas Employment , Government of Pakistan for recruitment of manpower. So PPA-Office Management System is developed to manage & integrate all PPA internal processes (i.e. client, contracts, jobs, job seeker registration, resume bank, recruitment process, and visa & departure process). We split this big system into following modules.
· Office Workflow Management System Administration: This application will allow the administration to
· Manage Companies, Contracts
· Application Configurations
· Manage invoices
· Manage administrative expenses
· Advertisement costs
· Courier charges
· Misc. charges to be posted
· Office Workflow Management System: This application will automate the recruitment process of PPA administration and will implement all the business processes hence allowing straight through processing of jobs. This application will have three separate work flows
· Pre Processing - Jobs management, Resume management and data entry, short listing, interview scheduling and execution, selection of candidates and forwarding for post-processing.
· Post Processing
· Archiving
· Online Client / Candidate Portal: This portal will allow
· PPA administration to manage advertisement jobs
· PPA affiliated companies to:
· Login into the system
· Add jobs
· View list of candidates forwarded by PPA administration, short list them, add notes
· Browse/Search (if allowed) resume database, create resume lists, add notes on resumes
· Potential candidates to:
· Register
· Add resumes
· Search for jobs
· System will allow the printing of all documents required during the execution of a case. System will allow three types of print
· Printing with PPA logo
· Printing without PPA logo - to be printed on PPA letter head
· Custom printing
NetSignNews.com - Hashe Computer Solutions
Role:
· Development Lead
Tools:
· PHP, MySQL
Details:
· Net Sign News is a specialized news channel for with hearing disabilities. NetSignNews.com is an online news portal for NetSignNews. News videos are streamed on demand using FLV format files. This application has a power administration utility using which administrator can manage

type="">
Jan'05 - Mar'06   Sr QA Analyst

Description:
Erie is one of the leading insurance companies in United States of America. The application, which is used by the providers & members of the company to get the info of doctors and route map. The application also calculates the amount of insurance required premium, cash value and benefit amount for all the years. In this web site there are five modules Geo Access, Web line, Security, Excel, and Eob.
Responsibilities:
· Analysis of the Specifications and creation of Test Designs according to the functional requirements.
· Involved in creating Test Plans, Test Cases and Test Scripts. Categorized Severity Incidents Reports based on severity and interfaced with developers to resolve technical issues.
· Checked the data for premium verification and interacted with Team lead and developers while testing the application.
· Documented test cases for Functional and Regression Testing.
· Experience with BRD's(Business requirements documents)
· Performed Data Driven Testing using extensive data in the test scripts.
· Created and ran various SQL queries to verify and validate Database in Oracle.
· Performed all phases of end-to-end testing which includes User Acceptance Testing, Functionality Testing and Regression Testing of the Application, its interfaces and Client-Server Utilities using Mercury Interactive Tools.
· Validated the policy data on mainframes after the nightly batch process
· Used TSO, ISPF to interact with the mainframe data
· Identified and validated test data for performing functional testing by using tools like Toad and File-AID. Created expected results for the assigned test scripts
· Developed SQL queries in Oracle to test the application for data integrity
· Customized Test Director to add new fields and provide key test and defect metrics to the management
· Compared actual and expected test results, discussed the defects in defect meeting with development team
· Participated in bug triage meetings with developers to validate the severity of the bug and responsible for tracking of the bug life cycle using Test Director
· Assisted the end users to perform User Acceptance Test on the application
· Tested web-based applications developed with Java and JavaScript using automated as well as manual testing.
· Wrote SQL and PL/SQL scripts to verify the database updates, inserts and deletes of the records.
Environment: WinRunner7.6, Test Director 7.6, Java, XML, XSL, Windows 2000, OS/360, JCL, TSO, DB2, File-AID, Oracle 9i, Solaris 8.0.
Dearborn Medical Center Hospital - MI.   Sep'03 - Dec'04
QA Analyst.
Description:
This project was designed for the new super specialty hospital. This was developed as a generic product, which could be further, marketed by the sale Points. The solution offers better and more efficient operations, achieve cost efficiency in operation and maintenance, and ensure their confidentiality and integrity of patient medical information.
Responsibilities:
· As a QA Analyst responsible for People Management, effective client interaction, Team coordination for productive quality deliverables to meet mile stones and deadlines as a single point contact.
· Involved in Entire Software Development Life Cycle and Test Development Life Cycle and Interact with Mainframes data using TSO.
· Created, Executed and managed Test Plan and Test design, Test Strategy & Processes for stand alone modules and integration of respective modules.
· Verification and Validation of different work products of Test development life cycle.
· Designed, executed and managed of test cases based on configurations, functionality, transactions, scenarios, business rules, conditions for different test buckets like regression,

functional, performance, Migration, Priorities and security
· Prepared Trace ability Matrix for root cause analysis, test metrics and test reports.
· Mainframe manual Systems Integration Testing of post implementation production defects and application change requests for TXU Electric/Capgemini Energy.
· Risk and Defect management (defect logging, tracking, triaging and status maintenance) Deliverables and Report generation.
· Testing Autosource web application in the QA environment using Mercury Interactive Load simulating tool Load Runner and recorded End-user actions and created test scripts to emulate the real user, using Win Runner and LoadRunner's utility.
· Log/monitor defects in Clearquest.
· Documented testing results for end to end Transactions and response times by analyzing the reports.
· Coordination with onsite and offshore Technical, Functional consultants and QA management to triaging, issues closure and status updating for efficient, effective and productive quality deliverables.
· EDI/Gateway testing.
Environment: Win Runner 7.02, Load Runner 7.8, Test Director 7.02, VB.NET, JCL, TSO, DB2, Visual Studio, XML, SQL and PL/SQL, Crystal Reports, Windows 2000, OS/390, and HTML/DHTML.

,
QA Analyst.
Description:

Worked as a QA analyst/tester with Rite Aids Online Pharmacy Store. The web application provides various services to the customers, which include ordering prescriptions online, shopping for drugs and products, online health information and expert health solutions.
Responsibilities:
· Involved in analyzing user business requirements, functional specifications.
· Developed Test plans for shopping cart module.
· Performed Black box testing.
· Involved in preparing test data and load the data in proper sandboxes for testing.
· Responsible for Front end and Backend Testing.
· Written and executed Test cases and Test Script after reviewing the business required document and technical specifications.
· Written Manually Functional Test cases for manual Testing.
· Written Detail Test cases for automation and used WinRunner to automate.
· Used various check points to test the functionality of the application by using WinRunner.
· Used Test Director for Test Management and Maintained the Test Cases and Test Scripts.
· Attended Business meetings, discussed the issues for testing further enhancements, if any.
· Logged the defects using TestDirector in time.
· Involved in Regression testing, Acceptance Testing.
Environment: WinRunner 7.0, Test Director 7.5, Visual Basic, ASP, Java Script, VB Script, Oracle, SQL, MS Access, Windows NT and Internet Explorer.
TATA Motors- India.

Feb'02 - Dec'02
QA Analyst.

Description:

This project is designed to do the accounting and reporting on finished vehicles through out vehicle's life cycle. The system collects vehicle data from different source systems through out the world and converts them into set of definitions like financial elements and documents. In addition to accounting data, the system has also the ability to provide reporting only information useful to both accounting and analysis.
Responsibilities:
· Responsible for writing and executing Test Plans, Functional Test Cases, Integration, Regression and System Test cases using Test Director.
· Prepared test approach documents, test plans and test scripts based on the company's Business Requirement and Detail Design documentation.
· Responsible for testing User interface screens and involved in rolling out the code after bug fix.
· Involved in writing Test scripts for executing system test cases.
· Running UNIX shell scripts to load the base tables.
· Attended the daily defects meeting and help the development team to resolve application issues and fixing defects.
· Unit testing and System Testing of various batch and report programs.
· Worked closely with manual testers and the development team in creating automated scripts on the Application using QuickTestPro tool.
· Utilized Rational Clear Quest to log/monitor defects.
· Created Data Driven Tests to validate the same scenario with different data using QuickTestPro automated tool.

	· *Identified and reported software defects using Test Director Defect tracking Tool.* *Environment: Quick Test Pro, TestDirector, J2EE, COBOLII, DB2, JCL, TSO, VSAMFile-AID, Web Sphere, Windows XP Proff, UNIX.* *VysyaBank, WiproTechnologies - India. , is one of the leading banks in India with strong and healthy fundamentals. The firm is a leader in investment banking; financial services for consumers and businesses, financial transaction processing. I was involved in System Testing of 'Account Access', an Online Banking Application developed in Java, HTML and Oracle, then Bank customers to access their accounts through the Web. The Application provides the 'Account Summary' for various accounts and ability to transfer the funds between various accounts using 'Fund Transfers'.* *Responsibilities:* *· Created, monitored and maintained Oracle databases from the specs provided* *· Created database objects including tables, indexes, clusters, sequences, roles, and privileges* *· Performed Black Box Testing to check the functionality and user requirements* *· Executed the test cases manually using Test Director and Prepared Bug reports* *· Monitored the scenario execution and identified the performance bottlenecks* *· Automated test scripts for functionality and regression testing using Win Runner* *· Tested the application for Broken Links to ensure proper navigation* *· Developed test procedures and used various check points* *Environment: Oracle 8i, Manual Testing, Win Runner, Test ,* *TOTAL, ,* *Test Engineer.* *Description:* *TOTAL, one of the world's largest integrated oil companies, explores for, develops, and produces crude oil and natural gas; refines and markets oil; and trades and transports both crude and finished products. Operating in more than 100 countries. It operates 28 refineries and 16,700 Total, Elf, or Fina-branded gas stations, mostly in Europe and Africa. The company is also a major producer of chemicals.* *Responsibilities:* *· Design and implementation of test cases based on HLD, LLD, Scenarios and transactions and responsible to all quality testing deliverables.* *· Automation testing implementation using -win runner, load runner, test director* *· Test Plan and Test design document preparation.* *· Preparation of Test Report and status maintenance.* *· Defect management (defect reporting and tracking), Test Metrics and Deliverables.* *EDUCATIONAL SUMMARY:* *Master of Science in Information Technology* *Bachelor of Computer Applications*
Software Engineer Intern Resume 15.pdf	*Honors: Phi Theta Kappa and Dean's List* *, • Perform installation procedures, custom programming and testing as required* *Barnett Technologies, Jacksonville, FLIntern, August 2006 - December 2006 • Built and installed PCs for staff • Established user accounts on appropriate networks • Traced and repaired network problems • Trouble-shooted various problems with staff computers • Trained personnel on network and various installed programs* *UNF Career Development Center, Jacksonville, FLPart-time Web Master, , and staff on web page creation and maintenance. • Developed graphics for various marketing and promotional materials* *OTHER EXPERIENCE* *U.S. NavyE-8, AWCS Anti-submarine Warfare Operator Technician, 2000-2004 • National Defense Ribbon • Meritorious Accommodation Medal* *, Upsilon Pi Epsilon, 2005 - 2008, Coordinator of Special Events, 2006Students in Free Enterprise, 2007 - 2008* *experienced Alumni*

ba-ex04.pdf	- Costa Mesa / Sacramento, CA 2002-2007 Primary customer contact for the nation's largest collector and provider of real estate focused public record data. Industries serviced: Lending, Title, Investor and Government. Territory - AL, LA, MS, OK, TX
	• Developed comprehensive account plan for designated key accounts that included account set up and on- going customer support and training on data, software, and custom solutions resulting in the discovery of major up-sell opportunities. • Supervised and analyzed account activity and delinquent reports at account level resulting in fewer billing and payment errors and shortened delinquent cycle. • Created client tracking system that allowed sales team to analyze ongoing customer revenue and usage. • Increased revenue retention by enhancing and aggressively pursuing integrated customer relationships resulting in decreased customer cancellation requests. • Presented comprehensive seminar to nationwide sales team on building client relationships. • Identified and pursued new sales opportunities as well as current customer up-sell potential resulting in significant new and add-on business for region and award for Top Territory Growth for 2004. Account Associate/Trainer - Sacramento, CA 1998-2002 Partnered with 7 sales representatives to provide pre and post sales customer service, training, and add-on sales to real estate-related companies. Territory - Southern California • Facilitated seminar training using presentation and training skills to all levels of users for real property database software resulting in an expansion of customer product usage. • Provided on-site training and software installation support to key account customers. • Developed and improved on-site and web-based training programs for newly launched product that resulted in 96% customer retention. • Coordinated and conducted sales seminar introducing new product line to additional market segments. , - Sacramento, CA Provided end-user pre and post sales support for computer peripheral products. • Resolved technical issues for printers, scanners, and mobile computing units resulting in increased customer satisfaction. • Educated customers on computer related products using extensive product and industry knowledge to create a more knowledgeable client base. • Generated accessory sales to end-users achieving monthly sales averages of 133% of target. PC SKILLS Microsoft Word, Excel, Outlook, PowerPoint, Publisher EDUCATION Bachelors of Arts in Design University of California at Santa Barbara Resume Contributed for Sample Purposes Only Written by ©AResumeWizard.com http://www.resume-resource.com http://www.aresumewizard.com Résumé Continued ... Linda A. Rinaldi 8624 Sunset Way • Sacramento, CA 95660 Home: 916.437.5298 • Mobile: 916.437.2280 • lrinaldi@comcast.net Account Management - Consulting - Training / Presenting Over 16 years of successful sales and account management experience practiced in transforming customer relations to that of valued business partner. Expert in consultative selling and translating technical solutions into compelling business opportunities. Adept trainer and presenter with talent for articulating message development and delivery to increase customer satisfaction and raise skill sets of team members. Proficient in Windows OS and MS Office. Familiar with Adobe Acrobat, Photoshop, web design programs, search engine optimization (SEO), and search engine marketing (SEM). Available for travel and relocation. Additional areas of expertise include: • Key Account Management & Retention • Technology Support & Implementation • Needs Assessment & Solution Selling • Customer Relationship Management • Communicating, Presenting, & Training • Process & Performance Improvement • Training Program Design & Development • Analytical & Conceptual Problem Solving SIGNIFICANT PROFESSIONAL ACCOMPLISHMENTS Boosted customer retention to 96% through the creation of comprehensive on-site and web-based training programs for Experian's newly launched products. Consistently achieved monthly sales averages of 133% of target for Canon Inc. by using strong sales skills to generate additional Accessory sales revenue. Awarded "Top Territory Growth" from Experian Corp. Aggressively identified and pursued new business and up-sell opportunities, significantly increasing sales for Eastern region. Reduced pre-production errors by 74% for Ford Motor Company's regional advertising campaigns while serving as account coordinator for FCB-Ulka. Spearheaded national online training program for end-users of Experian database solutions that led to development of company's first centralized training department. Increased viewer awareness of summer programming for Turner Classic Movies by facilitating the development of national ad campaign as junior account executive for The Miller Group.
	, to , providers of products for home and office with $6.8 billion in annual revenue. CUSTOMER SERVICE REPRESENTATIVE Interpreted, evaluated, and resolved telephone inquiries pertaining to hardware and software applications for computer peripheral products. Documented and tracked status of customer telephone inquiries, coordinated appropriate responses and followed up to ensure customer satisfaction. Successfully marketed and sold additional products to end-users. Selected Achievements: Recognized for leadership in sales and customer service. Achieved 133% of sales quota in

	1997. Ranked in top 2 of 20 customer service representatives. *Empowered new employees by providing training and support in product knowledge, market segments and company protocols, which increased productivity considerably.* *EARLY CAREER Held positions involving account management for The Miller Group and FCB-Ulka. Coordinated advertising campaigns for Turner Classic Movies, CA Movie Production Co., Los Angeles Olympic Committee, San Jose Tech Museum, and Ford Corporation.* *, - Sacramento, CA*

AntonyDeepakThomas.pdf	*(2 years 6 months)*

Led a team that was responsible for eight applications that support Toyota's functional areas such as
Customer services, Dealer operations, and Finance and Education services - all serving more than 1000
users. Identified and improved 94 pain points in all 8 applications thus saving 3000$ in person hours.
Designed and developed a regression testing tool that gained firmwide recognition; Won "Star Performer"
award from Toyota Motor Sales. Produced better code by refactoring control flows, improving standards
and cleaning the dead and unreachable; Final statistics showed a 64% reduction in code complexity and 10%
improvement in system stability.
Cofounder at BookMark Lending LibraryMay 2007 - May 2009 (2 years 1 month)
Partnered with my friend and started our own Small Business - Book Lending Library- that caters to more
than 800 book readers and houses more than 12,000 books. Designed and organized Innovative marketing
campaigns - Childfest & Naturefest - that increased business footfall by 20% and children membership
by 50% per month. Introduced the concept of Virtual library- a common stock of books shared by two
libraries - that significantly reduced inventory costs. Lauded by National Newspaper, "The Hindu" and
Local Newspaper, "Adyar Times" for services to the book reading community. Invested more than 60
hrs per month,while still serving as a Full-time Software Professional. Experienced and overcame classic
challenges in a business: sales slump, poor logistics, failed promotions, capital crunch, irate customers,
challenging employees, and threatening termination. Toolkit : Leadership, Communication, Creativity, Open
Mindedness
, (3 years 1 month)
Part of the team that Designed and Developed pricing application; Predominantly worked on custom controls,
data-bound events, CSS templates and AJAX requests. Received the "Diamond in the Rough" award
for learning the pricing system and producing quality bug fixes in a short time. Worked in a Project
Management system. Created charts and graphs using graphics class libraries in dotNET; Worked in reports
using SQL server reporting services. Hosted ASPNET webpages in Plumtree portal, a.k.a BEA Aqualogic.
Toolkit : C#, SQL server 2000 & 2005, AspNET v 1.1 & 2.0, ADONET, Aqualogic and SSRS.

Software Engineer Intern Resume 15.pdf	*University of North Florida, Jacksonville, FloridaBachelor of Science in Computer and Information Science, Minor in Graphic DesignMajor: GPA 3.87, Overall*
Software Engineer Intern Resume 14.pdf	*University of North Florida, Jacksonville, FL Bachelor of Science: Mechanical Engineering , • Chilled Water Plant Project: Performed the design and selection of an efficient water-cooled plant. Responsible for analyzing compressor efficiency and energy usage in order to reduce the operating cost of the selected plant. • Performed finite element stress analysis on a heat-treated aluminum bracket. Validated simulation results through analysis at particular locations along the bracket model. • PD and PID Control for ECP Model 205 Torsional Plant: Demonstrated concepts associated with proportional plus derivative (PD) and proportional plus derivative and integral action (PID) controllers and verified system response to dynamic inputs. • Pressure Vessel Design: designed a pressure vessel system in order to discharge sonic air flow into ambient conditions and into a second pressure vessel. Analyzed the mass flow rate of air under choked conditions in the two configurations. • U.S. Navy: Supervised a work center of 10-15 personnel. Responsibilities included preventive maintenance on board ship flight deck, inspection of support equipment such as tow tractors and firefighting gear, and aircraft firefighter and search and rescue team leader. • U.S. Postal Service: Responsibilities included setting up mail processing workstations, operating motor vehicles to transport mail within the facility and handling mail processing equipment.* *Skills/Membershipis • Proficient in written and spoken Spanish • Instrument rated pilot - Land Single Engine Aircraft (170 hours logged) • Member, American Society of Mechanical Engineers (ASME) • Member, National Society of Black Engineers (NSBE) • Member, Pi Mu Epsilon Mathematics Honor Society*

Software Engineer Intern Resume 13.pdf	*Bachelor of Science: Electrical Engineering, May 2009 University of North Florida, Jacksonville, FL • GPA 3.63 (working ~ 20 hrs/week while attending school) ENGINEERING AND COMPUTER SKILLS • VERILOG HDL - digital logic design • Motorola M68HC12 Microcontroller • C-programming language • ASSEMBLY- microcoding HC11/12 • PSPICE - analog circuit design • MATLAB - control system design • MathCAD - advanced mathematical computations • Windows XP • MS Office (Word, Excel, PowerPoint) • SensComp Series 9000 Transducers • TI MSP430 Mixed Signal Processor • TI TMP101 temperature sensor • Fairchild Plastic Infrared LED • Phototransistors, QEC122 and QSC113 • Image Craft ICC12C compiler environment • Motorola M68HC12 Microcontroller • Protel - printed circuit board development • Softbaugh LCD Modules • IAR Workbench TI MSP430 microcode development environment • MiniIDE Motorola HC12 microcode development environment RELEVANT EXPERIENCE •Embedded system design of an Intelligent Temperature Sensor using the Texas Instrument MSP430F449 microprocessor and the TI TMP101 digital I2C temperature sensor. •Embedded system design of an Intelligent Manhole Cover to detect fluid levels using TI MSP430 microprocessor, SensComp 9000 series acoustic transducer, and Motorola Creatalink 2XT 2-Way Pager for wireless communications. •Embedded system design of an Intelligent Alarm System using the Motorola M68HC12 microcontroller and Fairchild infrared devices, QEC122 and QSC113. •Embedded system design of an Intelligent Digital Scale with Wireless Display using the Texas Instrument MSP430F449 microprocessors, and Motorola ZigBee wireless transceivers. •Digital logic design, e.g. adders, multiplexers, decoders, ALUs, counters. •Analog circuit design, e.g. op-amps, filters, and pulse width modulation using BJT/MOSFET transistors.*
Software Engineer Intern Resume 12.pdf	*Bachelor of Science Degree: Electrical Engineering, August 2008 University of North Florida, Jacksonville, FL GPA 3.61 (Working 20 hours/week as research assistant while attending school) ENGINEERING AND COMPUTER SKILLS C - programming language PSPICE - analog and digital circuit design Maple - analog circuit simulation TI OPT101 - optical sensor rotel - printed circuit board design Texas Instruments MSP430 microprocessor Verilog HDL - digital logic design Motorola HC12 microprocessor SensComp transducer - ultrasonic ranging sensor MATLAB - controls system design harp GP2Y0A21YK - infrared proximity sensor Motorola Creatalink 2XT 2-Way Pager MS FrontPage - web design MS Word, Excel, PowerPoint - office applications AR Embedded Workbench IDE - TI MSP430 microcode development MiniIDE - Motorola HC12 microcode development in assembly Imagecraft IDE for ICC12- Motorola HC12 microcode development in C Cadence - digital logic design & communication system design Statistical Analysis Program (SAS) - communications analysis Linux, Unix, Solaris, Windows - operating systems* *, Autonomous Robot Design: Uses TI OPT101 optical sensors to follow lines, neodymium magnets formed in albach array for pickup mechanism, UART communication using infrared receiver, and 5 TI MSP430 microcontrollers for robotic control Intelligent Sewage Monitoring System: Responsible for power subsystem design and sonar measuring capability of embedded system using SensComp's ultrasonic transducer, and the TI MSP430 microprocessor to monitor sewer lines using real-time and wireless communication via Motorola's Creatalink 2XT 2-Way Pager Intelligent security system embedded design: uses keypad entry to access room monitored by hall effect sensor using the Motorola HC12 microprocessor. External alarm is triggered by wireless transceiver Analog circuit design, e.g. resonance transformer (Tesla Coil), sonar ranging module, and infrared distance detector Digital circuit design, e.g. digital phase-locked loop, and 916 MHz ASK wireless transceiver*
